

Accelerated Pathway from
Antibody
to **ADC**

Naresh Jain

Landscape of Clinical Antibody-Drug Conjugates

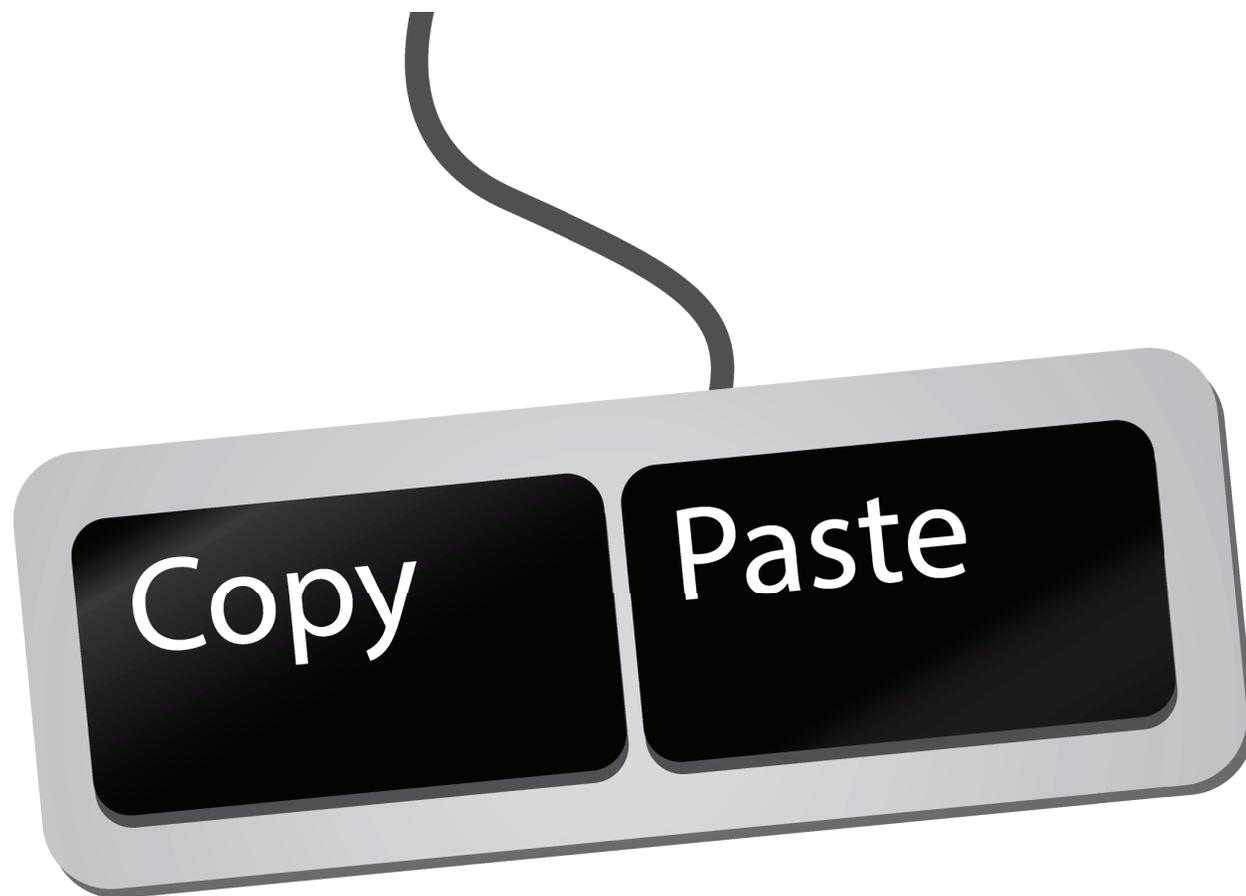

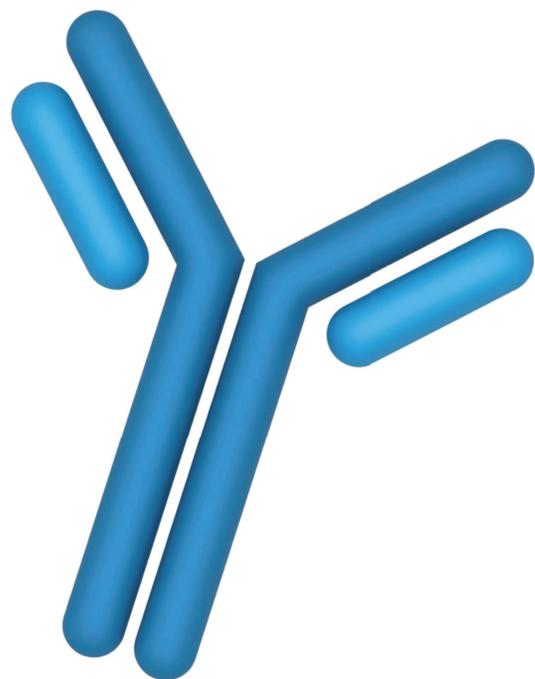

Source: **Beacon** Intelligence Database, October 2023

Discontinued & Not Active ADCs (Clinical)

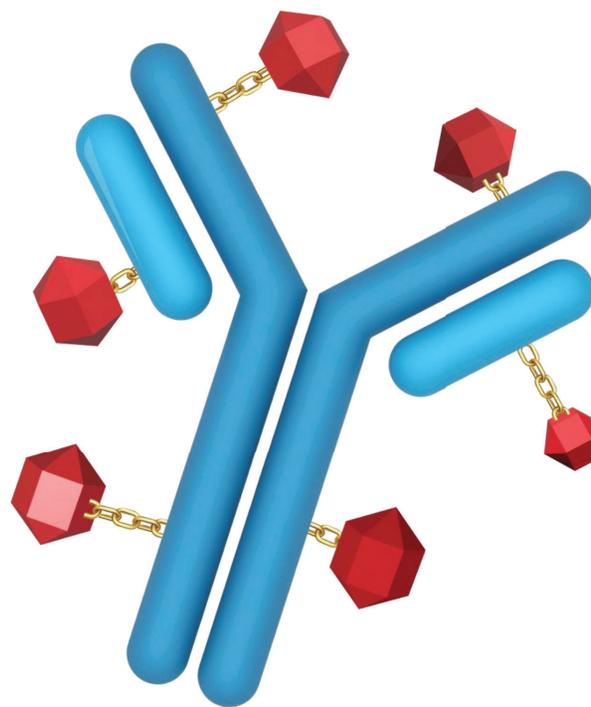

Payload Class	Tubulin Inhibitors	DNA Damaging agents	Topoisomerase inhibitor
Commonly used payloads	Auristatin (MMAE, MMAF), Maytansine(DM4, DM1), Tubulysin (AZ13599185)	Duocarmycin (DUBA), Indolino-benzodiazepine (IGN), Pyrrolobenzodiazepine (PBD)	SN-38, DXd/ DX8951, Camptothecin, Doxorubicin
Discontinued ADCs (Discontinued after PI, PII or PIII)	62	24	5
Developers	Mersana Therapeutics, Bayer, Amgen, ImmunoGen, Boehringer Ingelheim	Seagen, Roche-Genentech, Pfizer, Celltech Therapeutics, Bristol Myers Squibb	Daiichi Sankyo, Seagen, Immunomedics

Is this an
ADC Target?

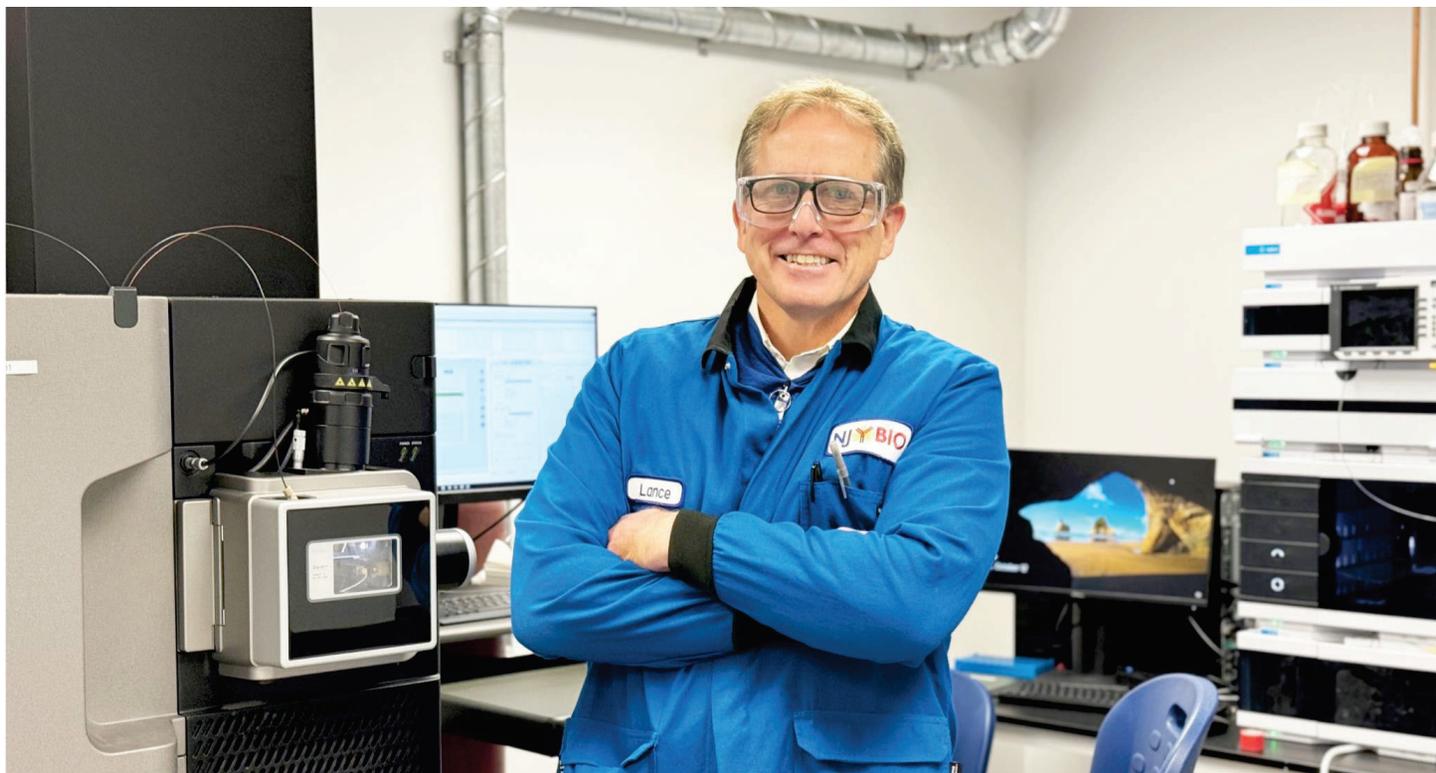

Do you have right
Payload linker?

SiteDAR

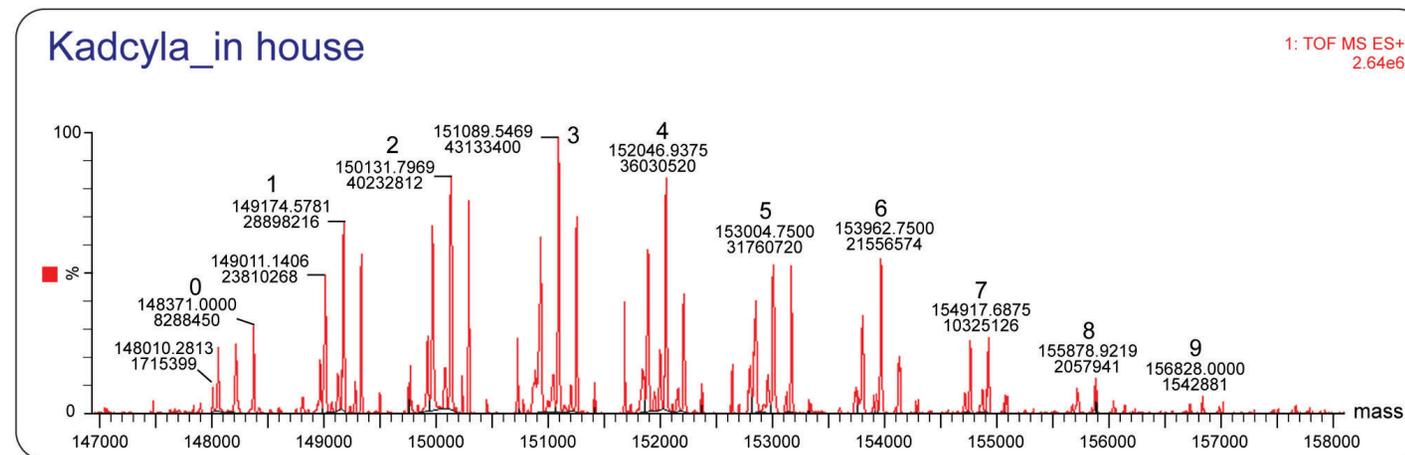

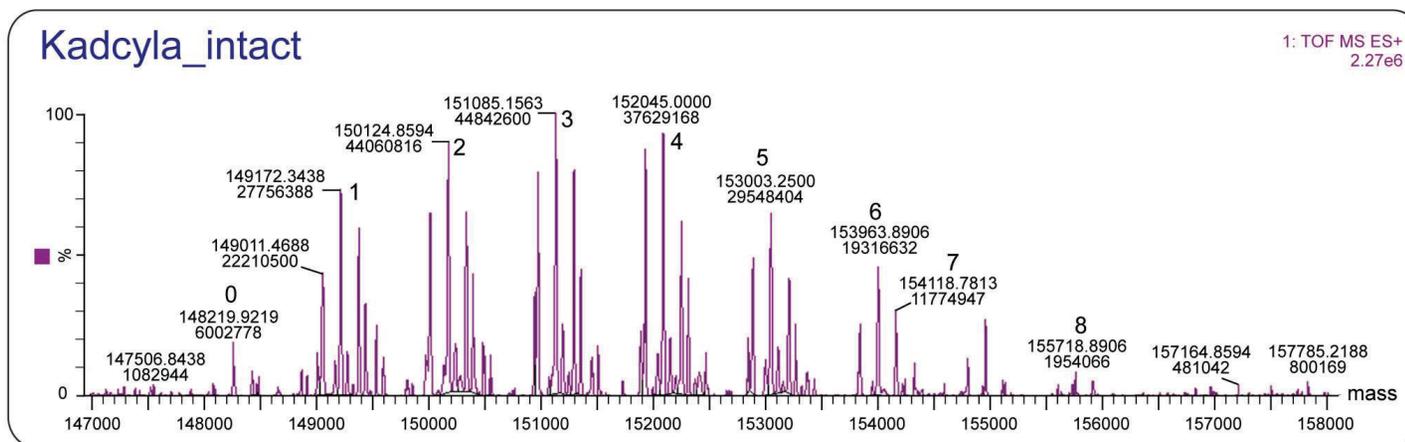

W. Lance Martin, PhD

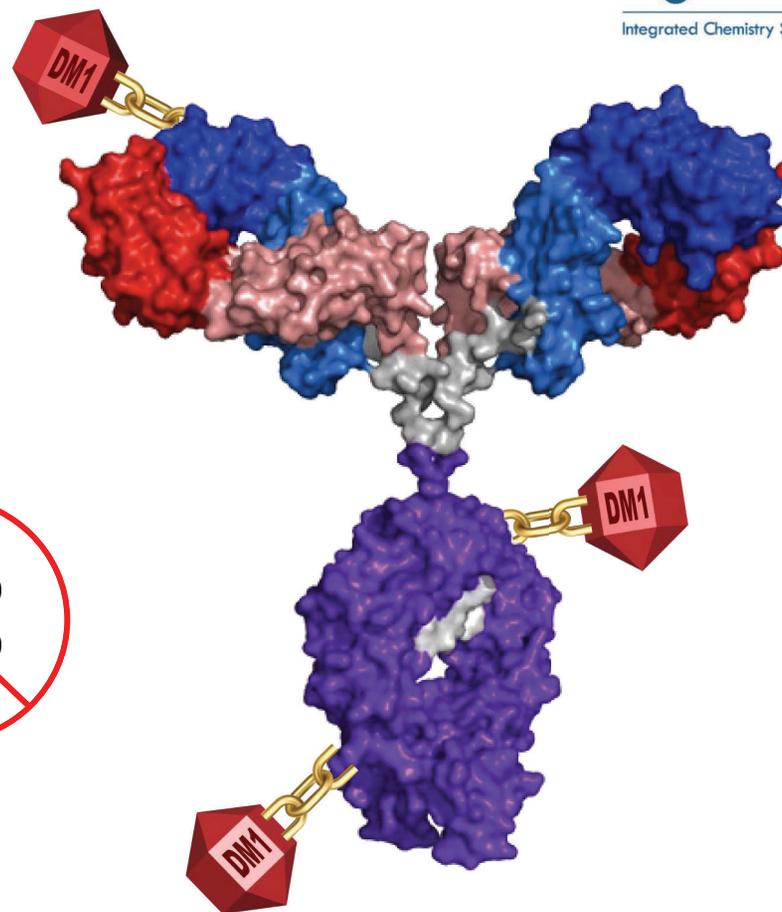

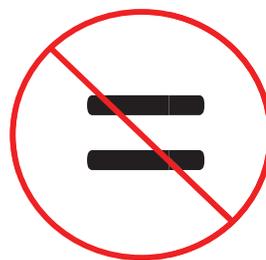

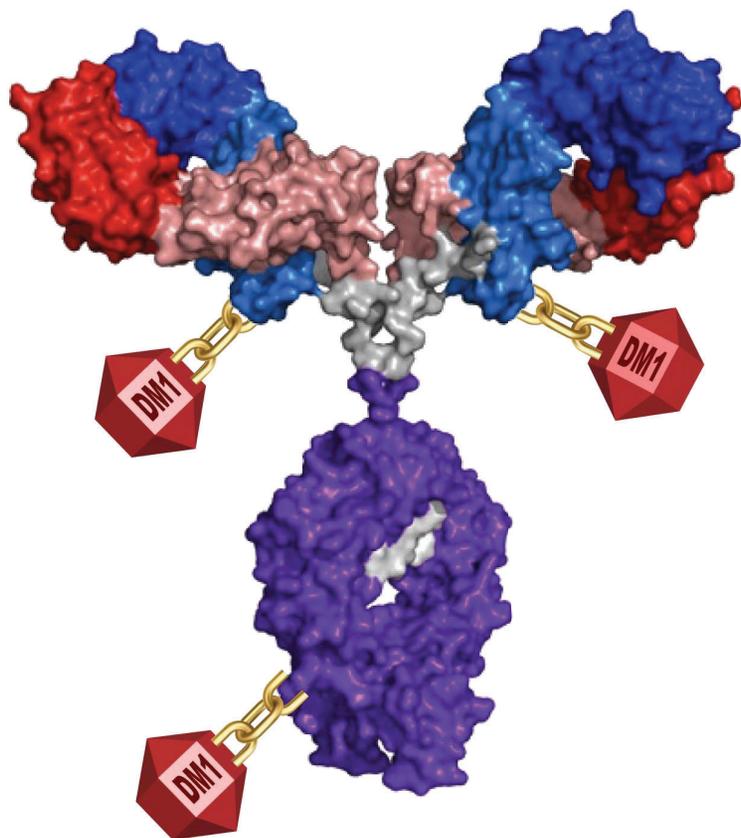

DAR conventional

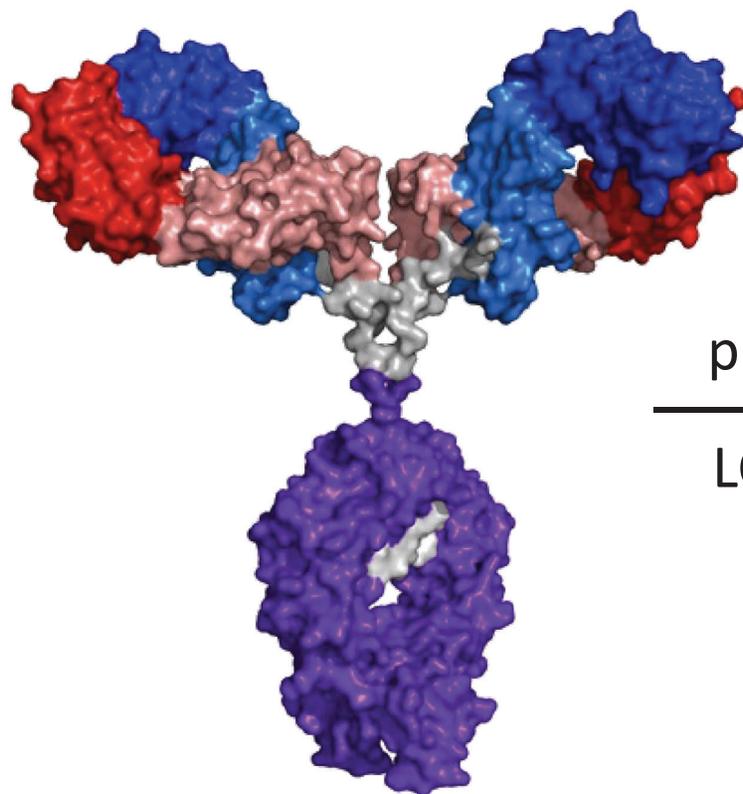

DAR 3.4

Biodistribution: the ADC cQA

Multi-Attribute Mapping (MAM)

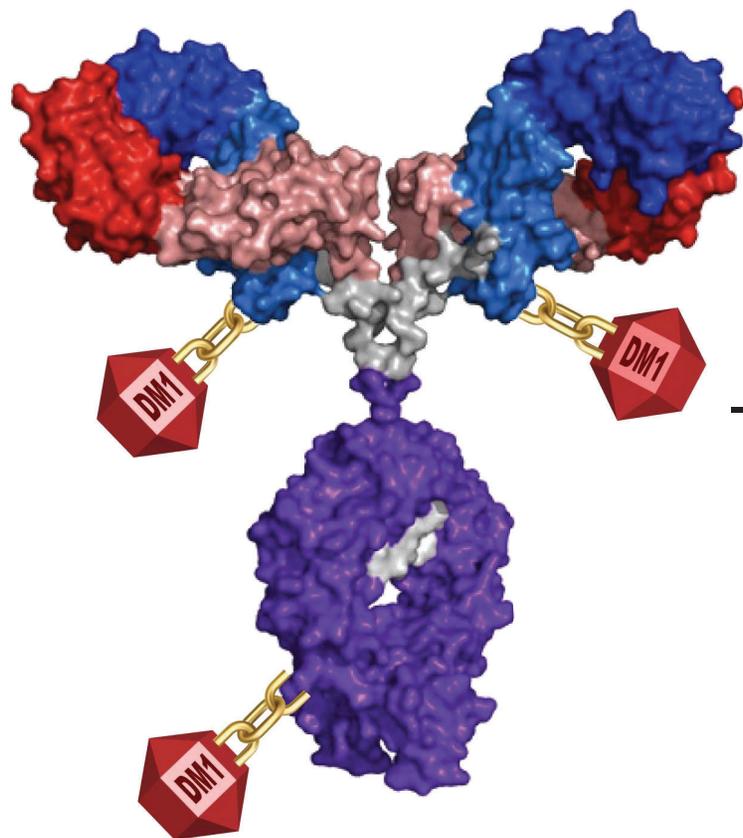

proteolysis
→
LC-MSMS

Oxidation?
Deamidation? → batch
Glycation? release

< specification?

SiteDAR

proteolysis
→
LC-MSMS

Drugs at
same sites?

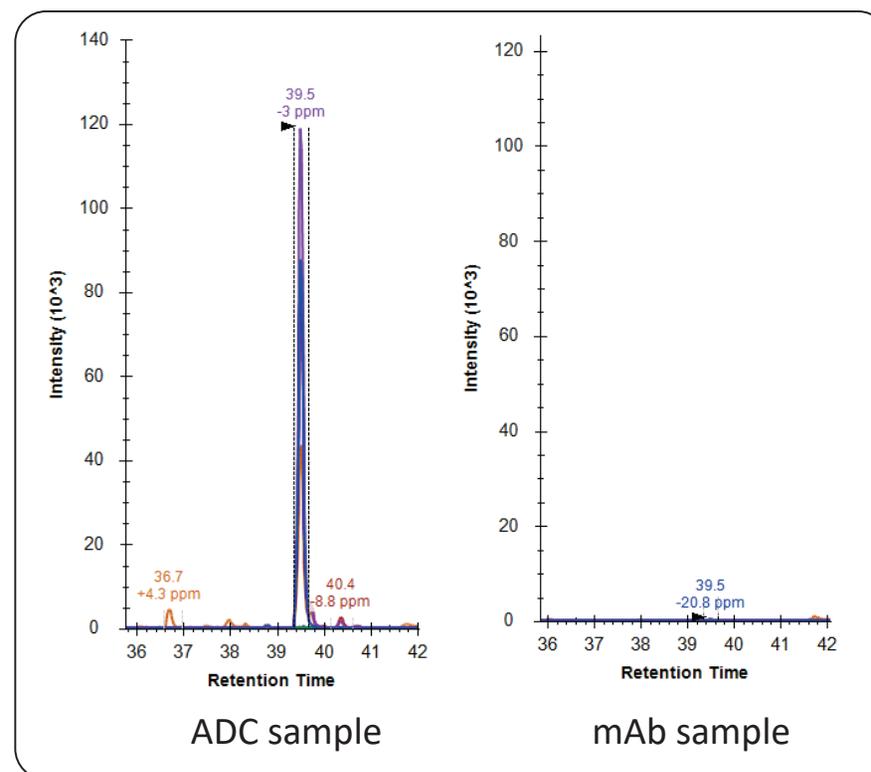

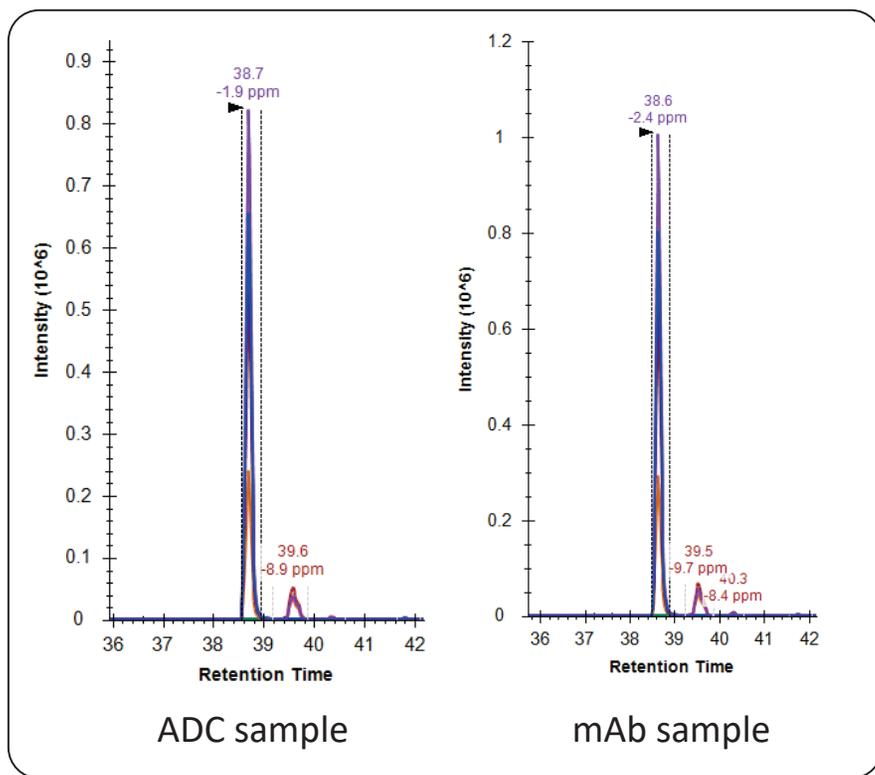

VVSVLTVLHQDWLNGKEYK
[DM1]

In the same
amounts?

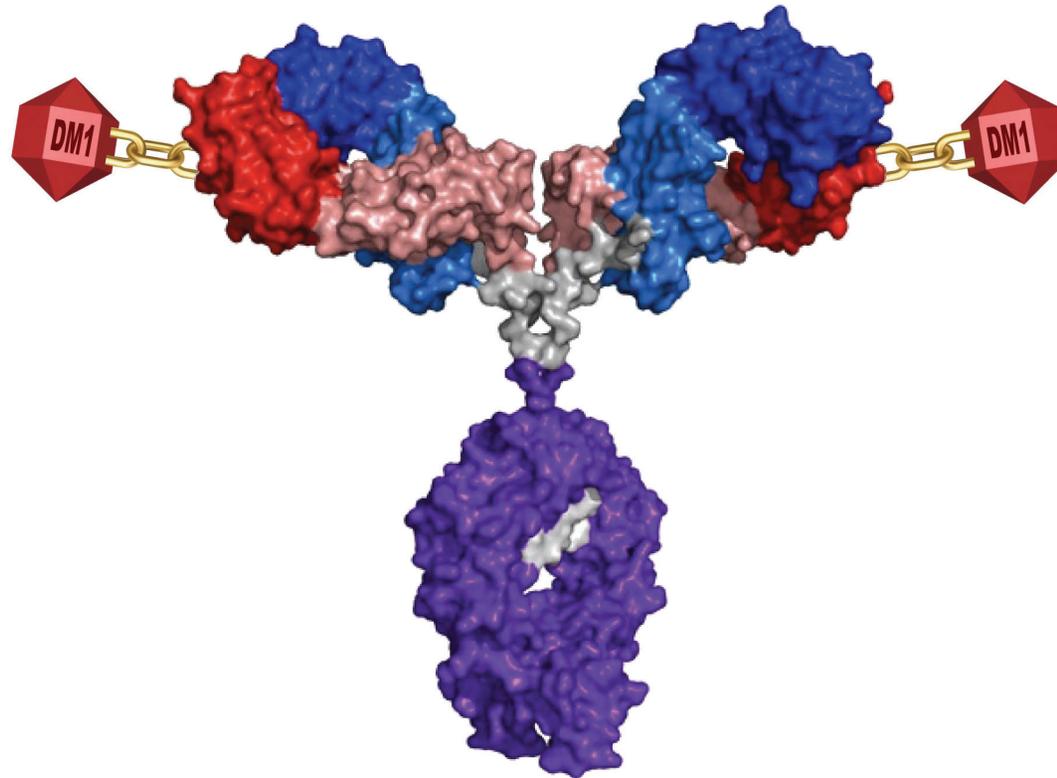

Which site? How much?

VVSVLTVLHQDWLNGKEYK

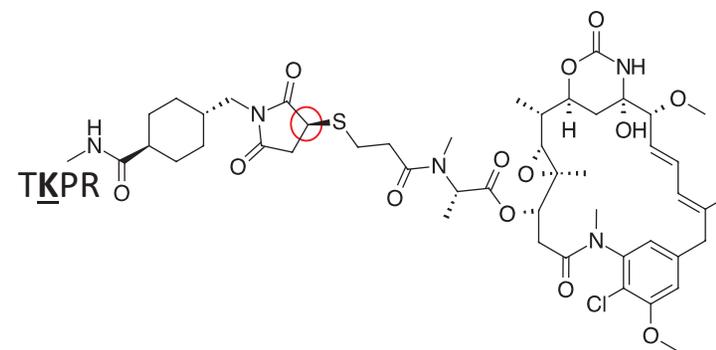

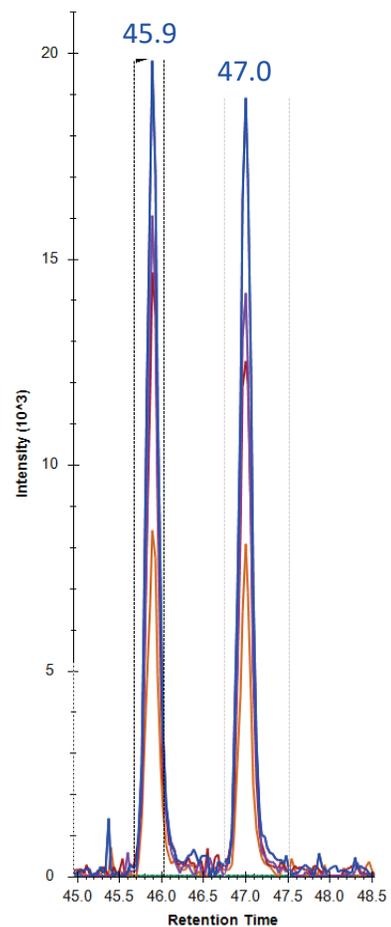

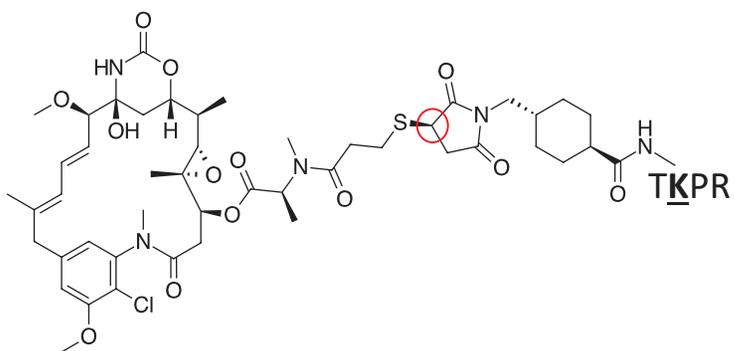

VVSVLTVLHQDWLNGKEYK
[DM1]

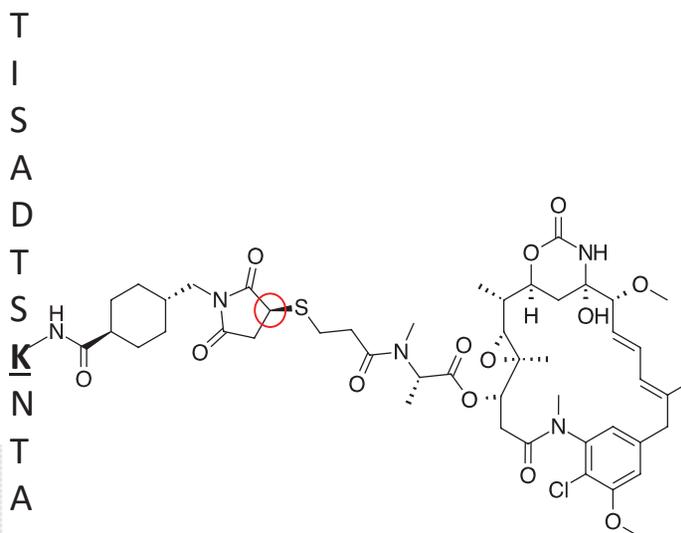

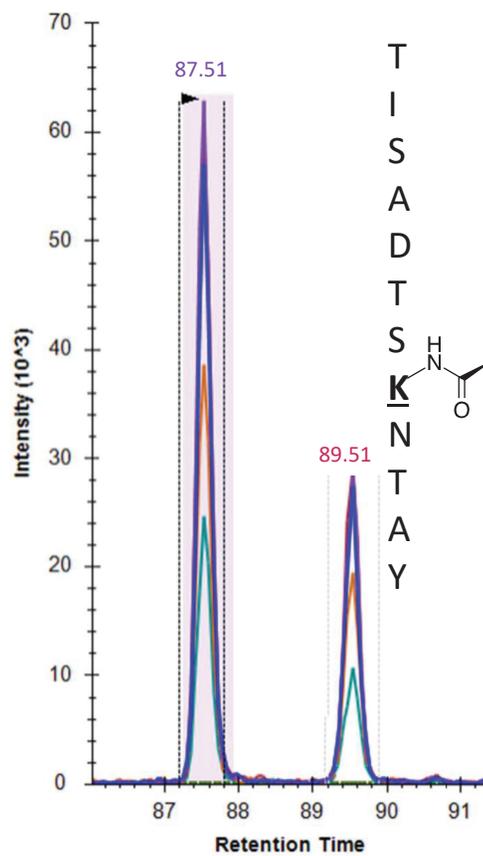

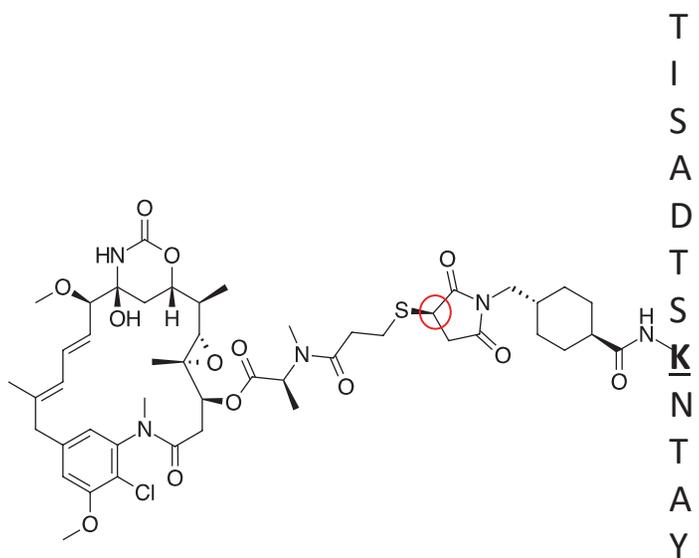

mAb modified at antigen site

Diastereomers!

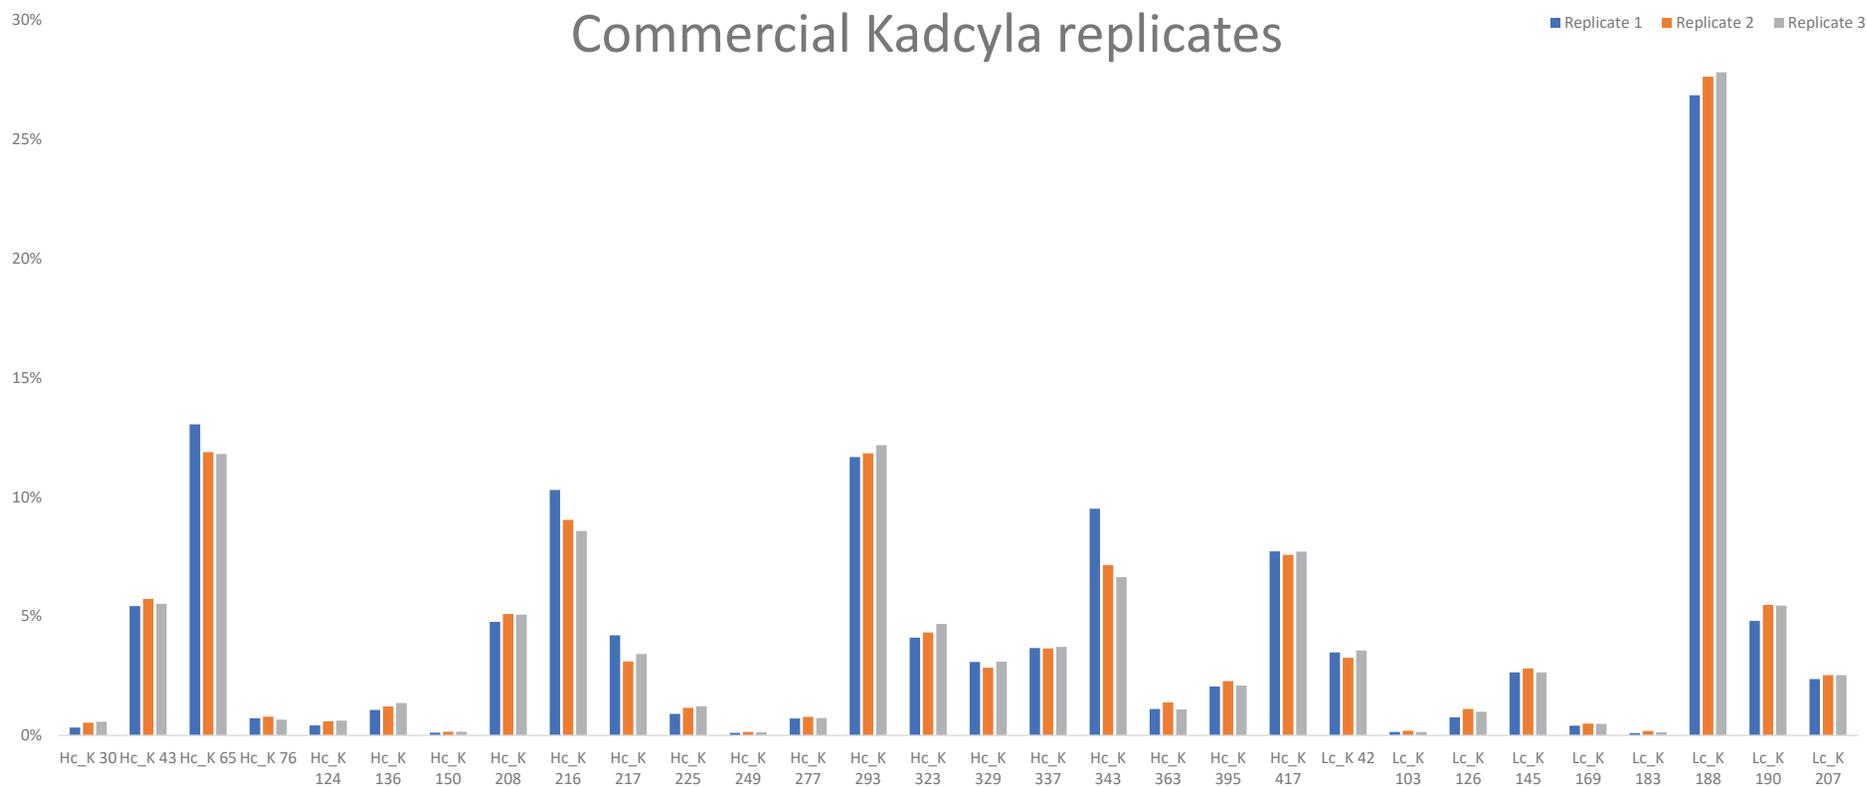

At different ratios

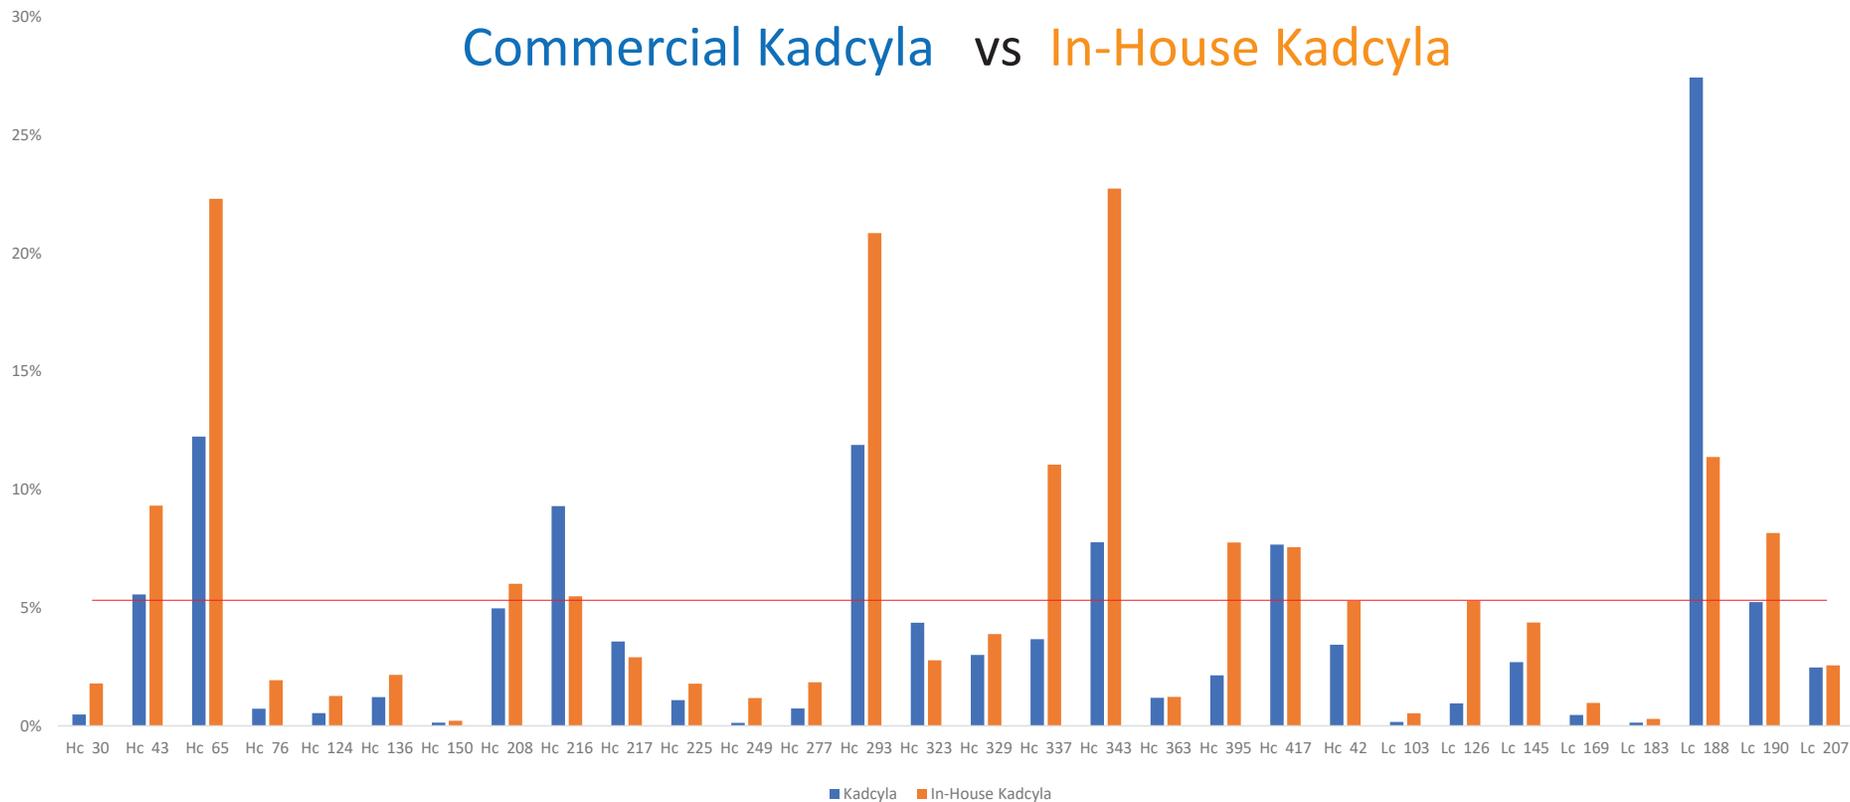

Measurement reproducible of SiteDAR

Commercial Kadcyła replicates

Same DAR – different sites

Commercial Kadcyła vs In-House Kadcyła

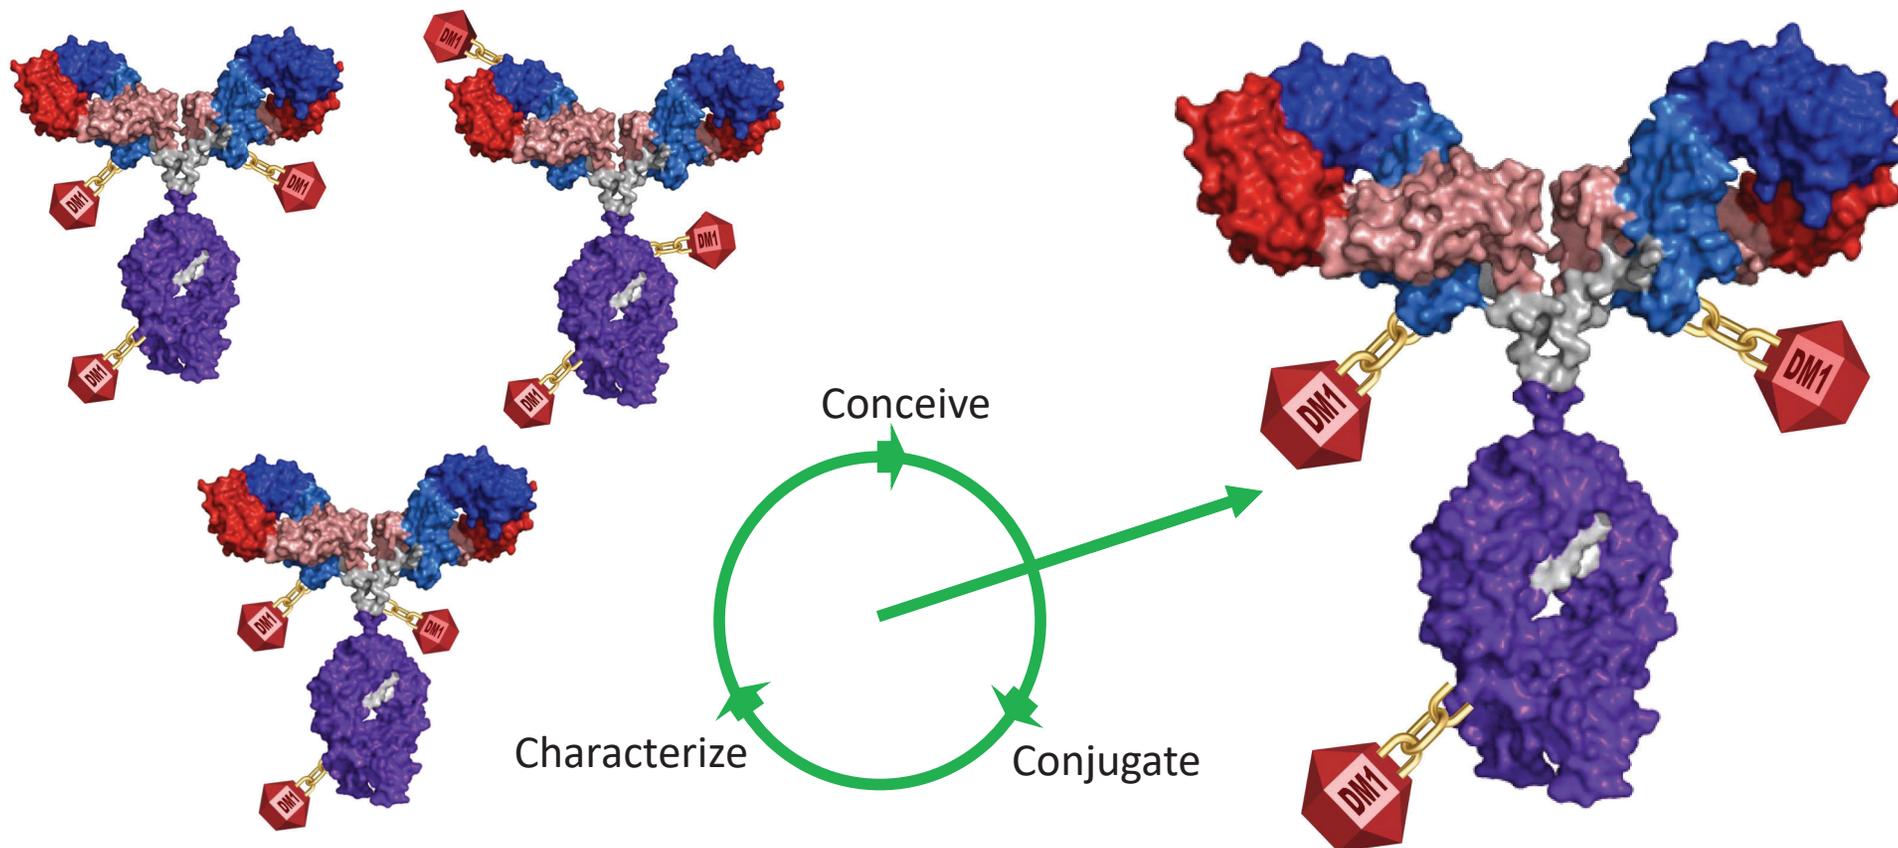

9 out of **11**

ADC biodistribution by design

BioNMR
